RE: Texas RSA 15B2 Limited Partnership d/b/a Five Star Wireless
E911 Location Accuracy Implementation Plan and Progress Report
PS Docket No. 07-114

Dear Ms. Dortch,

Pursuant to 47 C.F.R. § 20.18(i)(4)(i)-(ii), submitted herewith on behalf of Texas RSA 15B2 Limited Partnership d/b/a Five Star Wireless, is its E911 location accuracy implementation plan and progress report.

Should you have any questions, please contact undersigned counsel.

Sincerely,

/s/ Michael R. Bennet

Wireless E911 Location Accuracy Requirements)

PS Docket No. 07-114

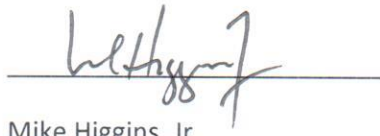

Texas RSA 15B2 Limited Partnership d/b/a Five Star Wireless E911 Implementation Plan and Initial Progress Report

Texas RSA 15B2 Limited Partnership d/b/a Five Star Wireless ("Five Star"), pursuant to Section 20.18(i)(4)(i)-(ii) of the Federal Communications Commission's ("FCC" or "Commission") rules, hereby submits its location accuracy implementation plan and initial progress report.

Five Star is a small non-nationwide CMRS carrier and does not provide service in any of the top 50 CMAs. Five Star entered into a services agreement with West Safety Services ("West") for infrastructure, software and services to enable Five Star to provide enhanced 911 ("E911") location data to E911-capable public safety answering points ("PSAPs"). Five Star has utilized the Location Performance Management ("LPM") tool provided by West to ensure compliance with location accuracy requirement of Section 20.18(i)(2)(i)(B)(1) of the FCC's rules. The LPM allows users to optimize network accuracy and identify areas for improvement. Its performance monitoring and reporting tools identify location performance issues and provide reports that allow for auditing key performance indicators and call results and analyze location server performance. The LPM provides live call data reports, 50 meter accuracy reports, and PSAP reports consistent with ATIS's 05000031 recommendation.

Although Five Star complies with the current location accuracy benchmark, it has been working to improve its location accuracy by installing a new server, the first phase of which was completed during the last quarter of 2016. The first quarter of 2017 was spent optimizing accuracy and in the second quarter of 2017, Five Star began the process of site certification with its local COGs and PSAPs.

Five Star plans to continue to do further testing and site certification to determine if additional measures are necessary to meet applicable future indoor horizontal location accuracy benchmark, and then make network improvements and adjustments to existing sites as necessary. Because Five Star does not provide service in any of the top 50 CMAs, it is not required to provide vertical z-axis location information.
